GITHUB CVS system – Uputstvo za korišćenje

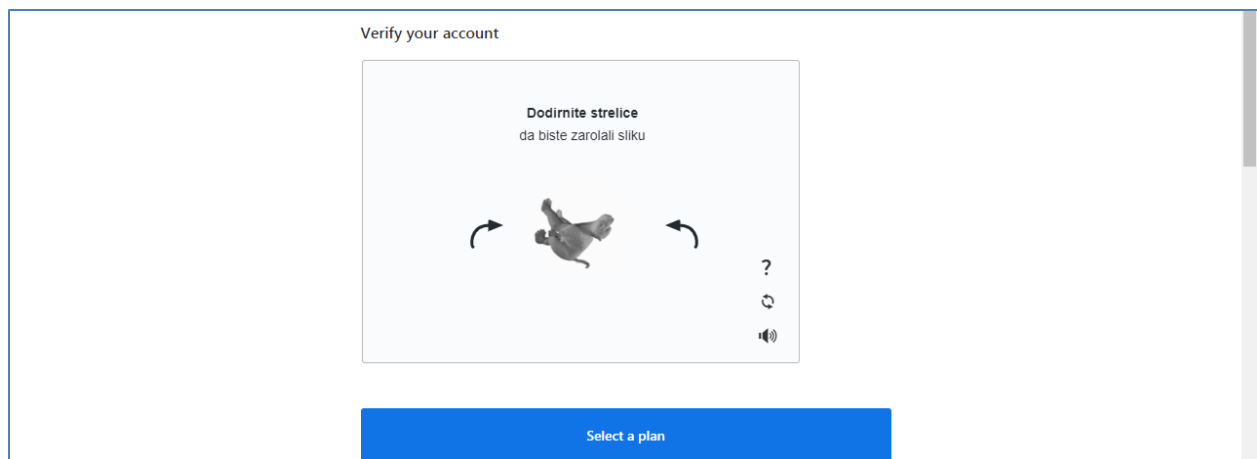

Web adresa: Github.com

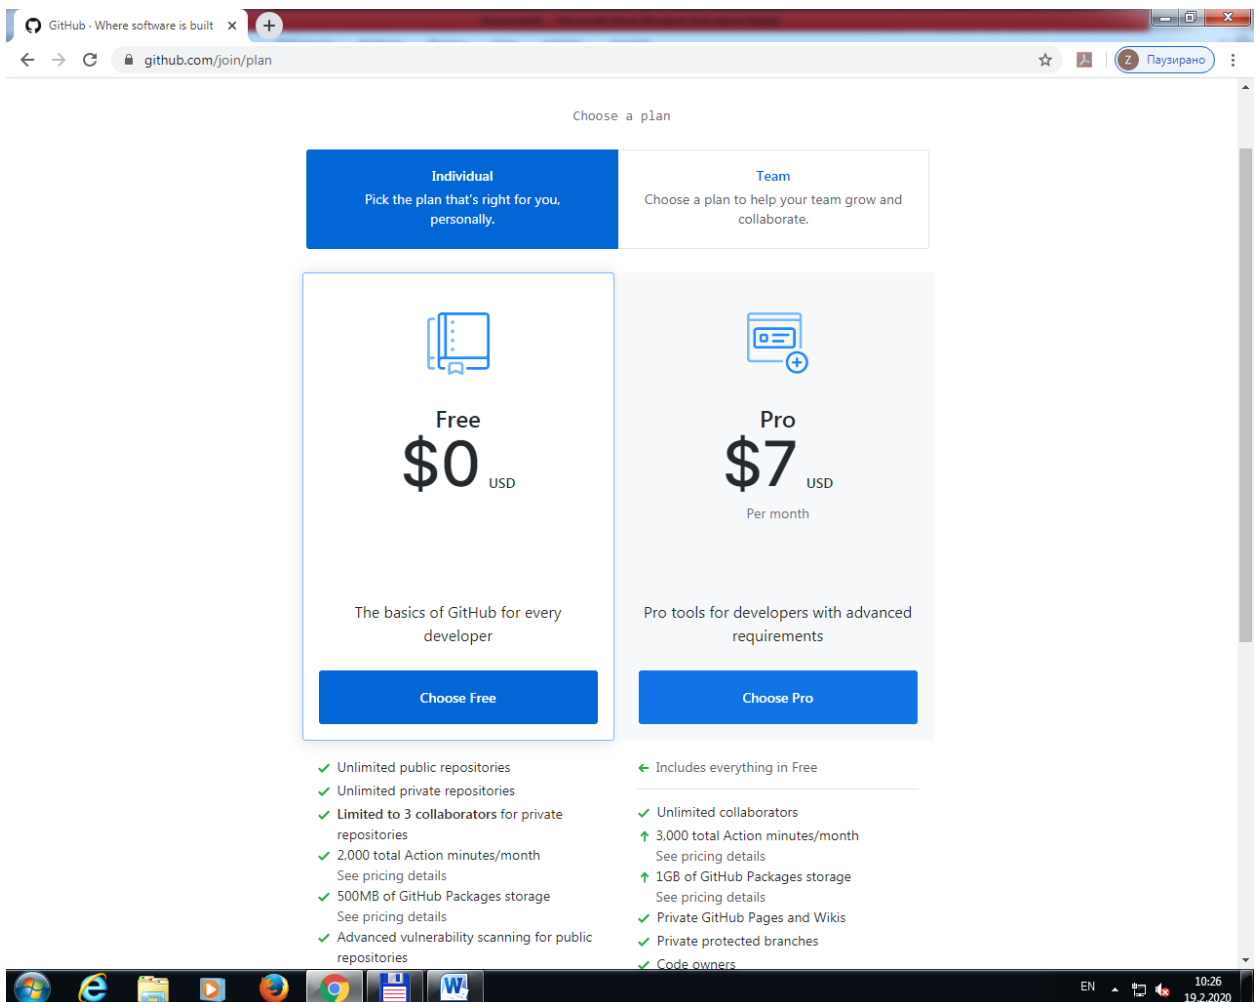

Prvi korak u korišćenju GitHub Sistema je kreiranje korisničkog naloga, opcijom "Sign up". Sledi unos korisničkog imena, email adrese i šifre:

Sledi verifikacija korisnika, opcijom "Verify", tj. "Verifikuj". Potrebno je rešiti nekoliko zadataka, tj. izvršiti rotacije slika.

Sledi dugme “Select a plan”, otvara se stranica gde se bira tip repozitorijuma: “Individual” - besplatan ili “Team” – profesionalni, 7\$/mesec. Birati Slobodan. Ograničenje predstavlja broj saradnika, maksimalno 3, što ukupno čini četiri člana za privatni repozitorijum.

Opciono se bira vrsta posla koju obavljate, koliko imate iskustva u programiranju:

github.com/join/customize

welcome to GitHub

Woohoo! You've joined millions of developers who are doing their best work on GitHub. Tell us what you're interested in. We'll help you get there.

What kind of work do you do, mainly?

| | |
|----------------------------------------|----------------------------------------|
| Software Engineer Software Engineer | Student Student |
| Product Manager Product Manager | UX & Design UX & Design |
| Data & Analytics Data & Analytics | Marketing & Sales Marketing & Sales |
| Teacher Teacher | Other Other |

How much programming experience do you have?

| | |
|-----------------------------------------------|------------------------------------|
| None I don't program at all | A little I'm new to programming |
| A moderate amount I'm somewhat experienced | A lot I'm very experienced |

... izbor tri stavke za vrstu delatnosti i upotrebu GitHub-a.

School work and student projects

Use the GitHub API

Other

I am interested in:

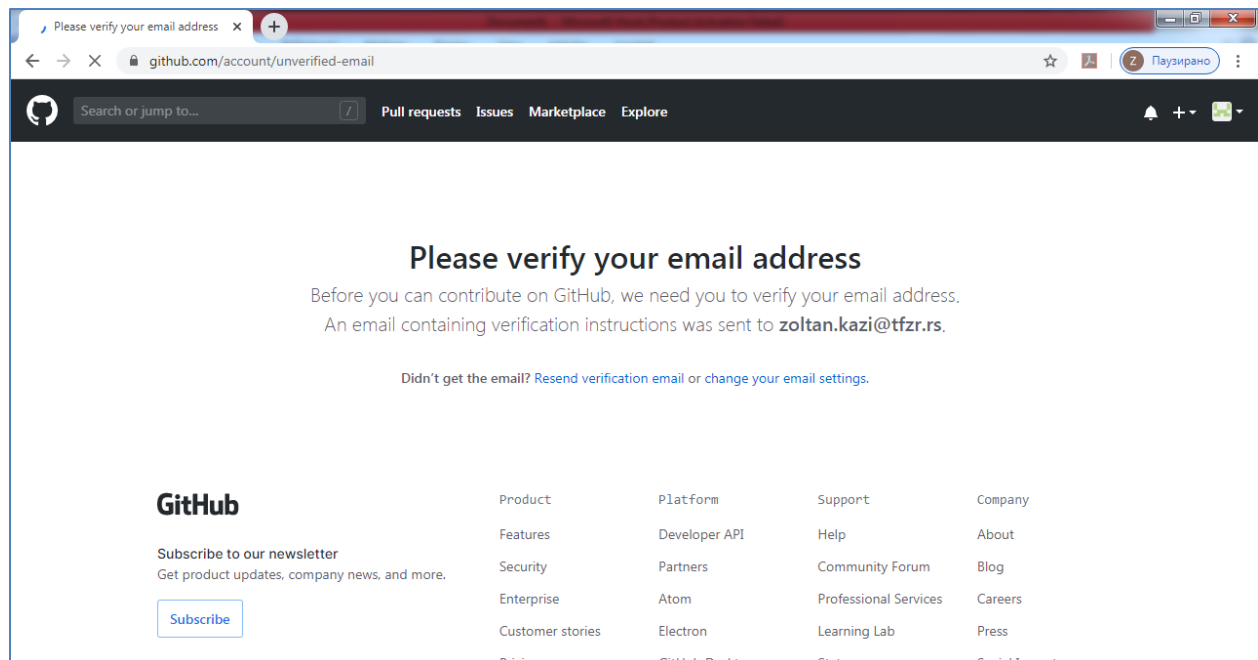

languages, frameworks, industries

We'll connect you with communities and projects that fit your interests.
For example: `backbone.js` `swift` `tic-80`

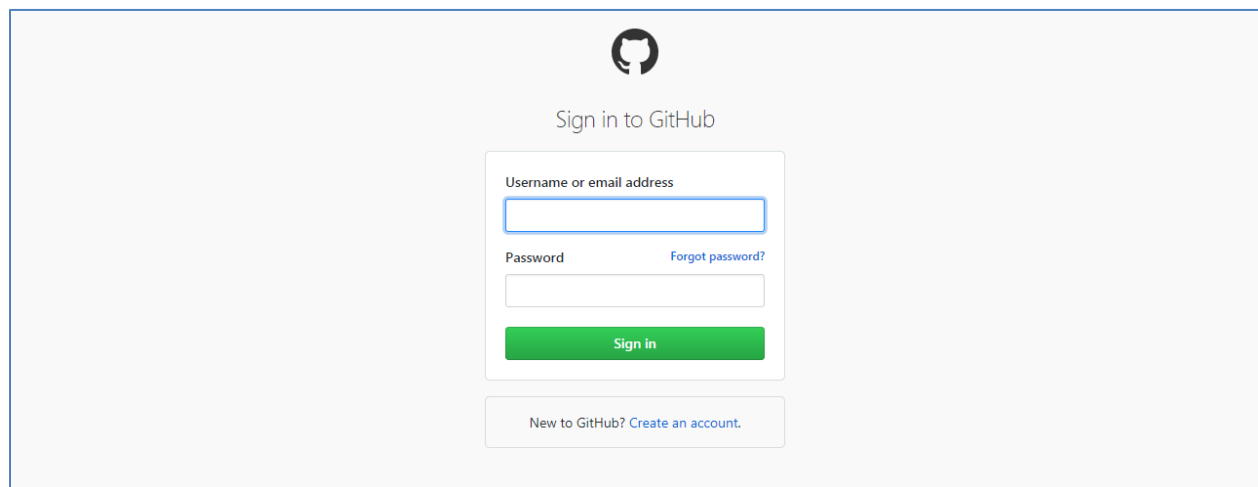

Complete setup

[Skip this step](#)

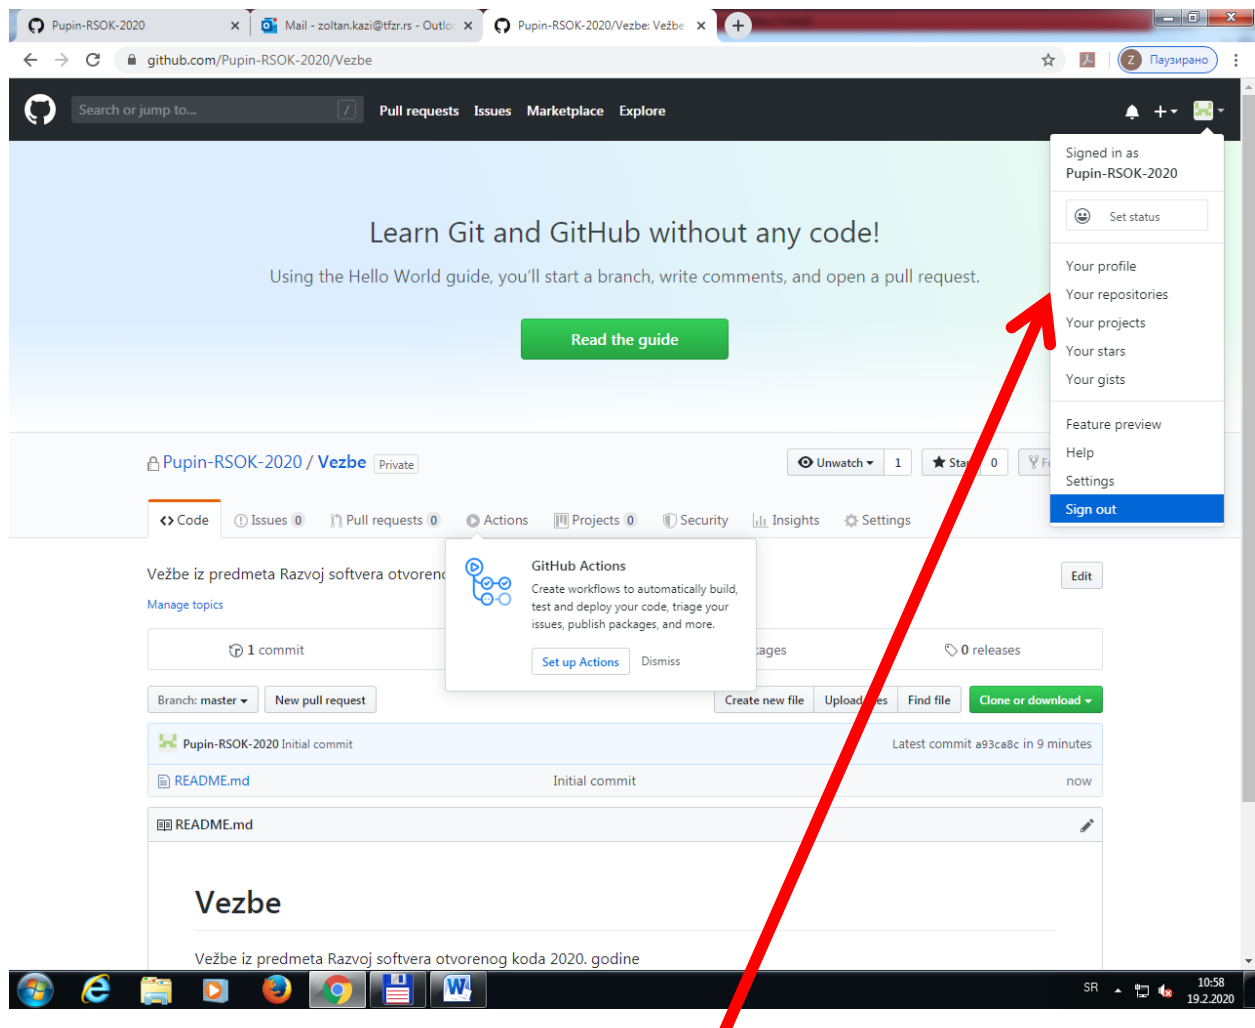

Završetak registrovanja korisnika, uz mogućnost provere emaila, prijavu na vesti GitHub-a i pregled postojećih repozitorijuma.

Prijava preko "Sign in" stavke se sastoji u unosu šifre i korisničkog imena I opcije za slanje nove lozinke usled zaboravljene šifre korisnika:

Nakon prve prijave prikazuje se osnovna stranica GitHub-a:

Moguće je kreirati novi repozitorijum, prvo se bira "Your repositories".

Kreiranje novog repozitorijuma, unos imena, opisa, vrste (javni ili privatni):

The screenshot shows the GitHub 'Create a new repository' form. At the top, there's a navigation bar with the GitHub logo, a search bar, and links for Pull requests, Issues, Marketplace, and Explore. Below the navigation bar, a message states: 'Your email was verified. Would you like to create your first repository?'. The main heading is 'Create a new repository', followed by a subtext: 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. The form includes fields for 'Owner' (set to 'Pupin-RSOK-2020') and 'Repository name' (set to 'Vezbe' with a green checkmark). Below these, a note says: 'Great repository names are short and memorable. Need inspiration? How about fictional-octo-waddle?'. There's a 'Description (optional)' text area containing 'Vezbe iz predmeta Razvoj softvera otvorenog koda 2020. godine'. Under 'Visibility', 'Public' is selected with the description 'Anyone can see this repository. You choose who can commit.', and 'Private' is also visible with 'You choose who can see and commit to this repository.'. A section for 'Skip this step if you're importing an existing repository.' contains a checked option 'Initialize this repository with a README' and a subtext 'This will let you immediately clone the repository to your computer.'. At the bottom of this section are two dropdowns: 'Add .gitignore: None' and 'Add a license: None'. A green 'Create repository' button is at the very bottom.

Prikaz novokreiranog repozitorijuma:

The screenshot displays the GitHub repository page for 'Pupin-RSOK-2020 / Vezbe'. The repository is marked as 'Private'. At the top right, there are buttons for 'Unwatch', 'Star' (1), and 'Fork' (0). Below the repository name, there's a navigation bar with tabs for 'Code', 'Issues' (0), 'Pull requests' (0), 'Actions', 'Projects' (0), 'Security', 'Insights', and 'Settings'. The main content area shows the repository description: 'Vezbe iz predmeta Razvoj softvera otvorenog koda 2020. godine'. Below this, there's a 'Manage topics' link, a '1 commit' indicator, and a 'Branch: master' dropdown. A 'New pull request' button is also present. A 'GitHub Actions' modal is open, showing options to 'Set up Actions' or 'Dismiss'. Below the modal, there are buttons for 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. The commit history shows an 'Initial commit' by 'Pupin-RSOK-2020' with the message 'Initial commit' and a timestamp 'now'. The 'README.md' file is visible, showing the title 'Vezbe' and the description 'Vezbe iz predmeta Razvoj softvera otvorenog koda 2020. godine'.
